

## Environmental targets for 2026

After analysing the context (internal, external and environmental constraints) affecting SOME, S.A.'s activity, risk assessment, identification and evaluation of significant and indirect environmental aspects, as well as the analysis of different opportunities for improvement, the following environmental objectives are set for the year 2026.

TARGET	TARGET DEFINITION	RESPONSIBLE
FIRST	Internal and external environmental communication on a quarterly basis	Production Quality & MA
SECOND	Reduce the carbon footprint of subcontracted transport by 2%.	Production, Quality & MA
THIRD	Reduce plastic packaging placed on the market by 5%	Production, Quality & MA

The monitoring of these objectives will be carried out periodically, as established in the corresponding procedure, by means of the indicators established for this purpose.
